REVAL BULB

LED strip REVAL BULB 120LED 1m CC constant current 24V 14.4W 1223lm 120° IP20 930

Product code 15036

State-of-the-art LED strip!

What makes constant voltage LED strips special?

These LED strips regulate the current of LED diodes to remain constant regardless of fluctuations in the power supply voltage. This means that the LED strip always provides uniform current, ensuring consistent illumination along the entire length of the strip.

In addition, constant voltage (CC) LED strips can be connected for longer lengths than regular LED strips. For example, with 4.8w/m, it's possible to connect up to 30m from one power source, but for more powerful LEDs, the length decreases. For 14.4w/m LED strip, the length is already 10m.

This LED-light with IP20 protection class is an ideal choice for home or office environments.

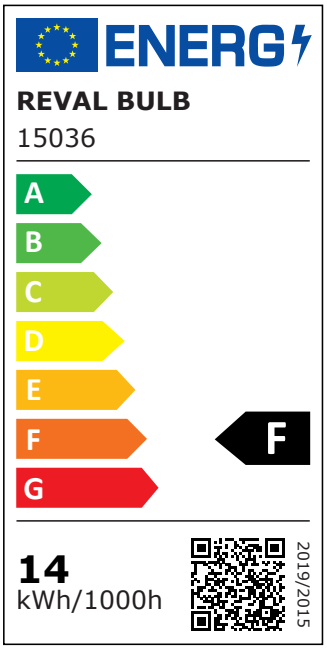

The specified price is per 1 meter of strip.

The total length on the roll is 20-50m, which can be cut according to your needs.
