

GROWATT EV Charger THOR 11AS-P WIFI 11000W IP65

Product code 16864

The THOR series intelligent three-phase AC charger is a power supply device that utilizes professional and advanced technology to provide energy to electric vehicles. It features a user-friendly man-machine interface and versatile control, billing, and communication functions. The charger can be connected to a back-office server to enable reservation and payment functions through a mobile phone app. Diverse communication options, including wired Ethernet, WIFI, and 4G, are available for connecting to the back-office server.

The charger is compatible with all branded EVs and can be integrated into existing or new-installed PV systems. It allows for charging electric vehicles with 100% renewable energy through surplus solar power. The charger can be controlled and scheduled through a smart mobile app, and it has an IP65 design that allows for indoor or outdoor use.
