

Wall light Trio Lighting Mario white 8.3W 800lm IP20 3000K warm white

Product code 19490

Timeless and minimalist. The simple design of the MARIO wall light goes just as well with an industrial style as it does with an elegant look. The round luminaire has a diameter of 16 cm and has two light sources that can be switched separately using integrated switches. Both the main light source with a light intensity of 600 lumens and the swivelling reading light with a light intensity of 200 lumens emit a pleasantly soft light colour. The MARIO reading light can be individually aligned, making it ideal as a wall light next to the bed. The light is also equipped with the FLEXconnect feature. This means that the light can be attached to the wall as usual in any position and supplied with power via a mains cable or connected directly to the fixed connection. In this case, the cable can be easily removed from the light. The restrained colour scheme in matt white leaves plenty of scope for combining with existing interiors and colours. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.

Correlated colour temperature	warm white 3000K
Luminous flux	800lumens
Brand	Trio Lighting
Output	8.3W
Protection class	IP20
Length	10.5mm
Diameter	160.0mm
Weight	1 kg
Package weight	1.2 kg
Casing colour	white
Casing material	aluminium
