## **LED garden light Trio Lighting IP67**

Product code 19541

Solar lights use only the power of the sun to produce light. At the same time, they are extremely environmentally friendly, economical and equally practical, as they require neither sockets nor a connection to the mains. In combination with modern LED technology, solar lights provide ideal light for home and garden. Simply place the solar light where illumination is needed. The MELO round solar light provides an atmospheric ambience and inviting light accents around the house thanks to the integrated RGBW colour changer. Control it using a switch on the light and the included remote control. Due to its IP65 protection class, the luminaire is dustproof and protected against water jets. The lighting time of the solar light is 6 hours and the charging time is about 8 hours. The neutral design in white, allows an easy integration into your garden and sets additional modern accents.

Brand                Trio Lighting

Protection class IP67

Diameter          280.0mm

Energy class
