

Recessed light Trio Lighting Pamir black round 5,5W 345lm 36° IP20 830

Product code 19548

The secret of TRIO recessed luminaires is: timeless.flexible.design-orientated. With the right recessed luminaires, you can set stylish accents and create an atmospheric ambience. The recessed luminaires in the PAMIR range are ideal for targeted and effective lighting of your living spaces. The recessed luminaire in a classic reflector design can be swivelled and emits directional light with a beam angle of 36°. The recessed luminaire can also be dimmed externally so that the brightness can be individually selected. Thanks to IP23 protection, the PAMIR recessed luminaire can be used in kitchens or covered entrance areas without any problems. The round PAMIR recessed light has a diameter of 85mm and requires a ceiling cut-out of 72mm and an installation depth of at least 68mm. No additional transformer is required for the installation and linking of several recessed luminaires. The matt black colour scheme rounds off any straightforward and modern furnishing style. In addition, the luminaire features modern LED technology, which is characterised by high light quality and energy efficiency. Compared to conventional halogen lamps, up to 80% of energy costs can be saved. In addition, LED light sources have a long service life, produce less heat and protect the environment.
