## **PoE network speaker with headset controller**

Product code 20132

This is a professional IP network speaker equipped with built-in  $2 \times 15$  W digital amplifiers, a 5" woofer, and a 2" tweeter, providing clear and well-balanced sound. The device is compatible with 10/100 Mbps Ethernet networks, supports PCM, ADPCM, and MP3 audio formats, and operates using TCP/UDP/IGMP protocols. The speaker can be powered either via 48 V PoE or an external 24 V power supply, enabling flexible installation. Its enclosure is made of durable ABS plastic, and a mounting bracket for vertical or horizontal installation is included. Ideal for schools, conference rooms, restaurants, retail areas, and any setting requiring a reliable network audio speaker.
