

LED strip Trio Lighting Racer 10W 750lm IP20 RGB + 3000K RGBW warm

Product code 22002

Feel the light of gaming! The RACER strip light impresses with the many ways in which it can be used. As a light accent on individual pieces of furniture or as indirect, glare-free lighting on a TV or PC screen, the RACER light strip lends the ambience a modern and special character. The three metre long LED strip can be shortened at the markings provided, making it ideal for personalised design. The Dynamic Light function creates a fascinating atmosphere with pre-programmed, dynamic lighting scenarios that add fascinating lighting effects to the multi-coloured or monochrome mood lighting. The Stripe is also equipped with the Sound Control function. Using a built-in microphone, the RGB LEDs react to ambient noise in real time and transform music, films and gaming into captivating, rhythmically adapted light effects. All functions and the brightness can be controlled using the included remote control. The Stripe is kept in a plain black colour so that it blends unobtrusively into any furnishing style, especially when switched off. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.

Correlated colour temperature	RGBW warm RGB + 3000K
