

Switch THPG Rocker switch intermediate Duroplast white IP20

Product code 22655

From a historical perspective, toggle and rocker switches are the direct ‘successors’ to the tried and tested rotary switches. They have a simpler design and are particularly easy to operate - even with your elbow if necessary when your hands are full. Our models stand out from today's conventional ‘surface switches’ with their oversized rockers thanks to their attractive proportions, classic materials and durable switching mechanism. Our switches are also characterised by tried-and-tested screw contacts and a steatite base body.

Brand	THPG
Rated current	10mA
Protection class	IP20
Diameter	70.0mm
Casing colour	white
Casing material	duroplast
Work environment	indoor use
