LERNA series power distributors offer a number of advantages. With two sockets and a total load of 3,680 W, they allow you to connect various devices while providing reliable lighting. Light and sockets can be switched separately (separate L+N). The socket cover latches open for additional convenience. The ability to adjust the light colour in two stages (3,000 K/4,000 K) allows you to choose the colour temperature that sets the perfect ambience. The downward orientation of the lighting also fully guarantees efficient illumination without creating light pollution. LERNA series bollard lights are available in two different sizes (600 mm and 1,000 mm). With a output of 7,4 W and 256 lm, the light itself is incredibly bright.
