With spring clips and integrated shutter Socket with side earthing contacts and shutter for surface mounting. With solid screw contacts. The housing is made of black Bakelite. The integrated shutter ensures increased protection against electric shock. Installing electrical wiring and switches on the surface is by far the most economical means, of course, which is also why this is the most common type of installation in workshops. It eliminates the need to cut or pry open the walls and allows for easy inspection, repairs, and expansion of the system itself and its wiring network. It is also a good option anywhere that installation on the wall surface is advisable or required for structural reasons (historical preservation, wood beams, concrete, etc.), whether the wiring itself is also installed on the wall or inside it. Two small drill holes are all it takes to ensure a firm hold. Taking their shape from classics in their genre, all of the parts of our surface-mounted series comply with present-day standards and safety regulations in technical terms. The sturdy, 2.5-millimetre housings made of black Bakelite are moulded in a single piece and provide sufficient protection for the electrical components underneath. Openings on the sides allow wiring to pass through. The back of the housing is open. For the mechanical parts, we rely on the same proven components that are used for the other switch series. Here, as in the other switches, the ceramic switch action ensures uniform switch contact that is gentle on the materials.

Socket THPG Bakeliit black IP44

Product code 22648

Brand THPG
Output voltage 250V
Rated current 16mA
Protection class IP44
Width 97.0mm
Length 70.0mm

For horizontal layouts with two outlets, e.g. for two or more outlets at different locations in a single room. Two-part case and lid made of Bakelite with adjacent in- and outputs. Two lateral screw attachments facilitate wall mounting. Outlet with integrated shutter. With spring clips. Cable mounted on wall surface. Safety rating IP44 with sealed lid, rating IP20 when plug inserted. Each outlet comes with an additional rubber ring: if applied to an IP44 plug as an additional seal, the outlet attains safety rating IP44.

Socket THPG Bakelit Data socket Cat.6 black IP20

Product code 22632

Brand THPG
Protection class IP20
Diameter 70.0mm
Casing colour black
Casing material bakelite
Work environment indoor use

Data socket with two RJ45 network connections (real.Cat.6a) for the switch system Bakelite. The central insert is made of Bakelite and is compatible with the coverings of the switch system Bakelite specially designed for junction boxes. Note: For problem-free installation of the data socket, we recommend flush-mounted sockets with an enlarged socket volume. Data socket with two RJ45 network connections for the switch system Bakelite. - Bakelite central insert - with 2 x RJ45 network connections (real.Cat.6a) - for use in 10 Gigabit Ethernet networks (transmission bandwidth up to 500 MHz) - Ø 7.0 cm Note: For problem-free installation of the data socket, we recommend flush-mounted sockets with an enlarged socket volume.
