High-quality LED strip with a thick circuit board. A unique feature is the ability to cut the strip after each LED, making it ideal for installation in complex situations! LED strips are flexible and can be easily customized to fit various installation needs and surfaces, such as furniture, shelves, stairs, etc. This RGB LED strip allows for a wide range of colours, including various shades that can be adjusted according to user preferences or the situation. The specified price is for 1 meter of the strip. You can trust in our products because we sell hundreds of meters of LED strips every day! Send us an inquiry, and we'll make you an offer!

State-of-the-art LED strip! What makes constant voltage LED strips special? These LED strips regulate the current of LED diodes to remain constant regardless of fluctuations in the power supply voltage. This means that the LED strip always provides uniform current, ensuring consistent illumination along the entire length of the strip. In addition, constant voltage (CC) LED strips can be connected for longer lengths than regular LED strips. For example, with 4.8w/m, it's possible to connect up to 30m from one power source, but for more powerful LEDs, the length decreases. For 14.4w/m LED strip, the length is already 10m. This LED-light with IP20 protection class is an ideal choice for home or office environments. The specified price is per 1 meter of strip. The total length on the roll is 20-50m, which can be cut according to your needs. If you couldn't find a suitable option from our product range, feel free to send an inquiry!

REVAL BULB plant growth strip is perfect for indoor plants, providing them with the necessary heat and light intensity. This is crucial for the healthy growth and development of plants. The light temperature of this strip mimics natural sunlight, aiding the process of photosynthesis in plants and enhancing their overall vitality. Thanks to its compact size and flexibility, the LED strip is easy to install even in small greenhouses, shelves, or hydroponic systems, maximizing space efficiency. With low energy consumption and high efficiency, the LED strip is an economical choice, reducing electricity costs while providing the necessary spectral light for plants.

This colorful [LED strip](#) is perfect for creating a cozy atmosphere in dry indoor spaces. The strip can be extended by soldering. You can connect a maximum of 7-8 meters to one power supply unit. The back side of the strip has 3M double-sided tape, making installation particularly convenient. For best durability and heat dissipation, we recommend installing it with an aluminum profile. The specified price is per meter of the strip. This product requires a power supply unit to operate. You can also find it in the LED house product range!

This flexible LED strip is an ideal detail to make rooms more distinctive! The LED strip can be bent at an angle, and thanks to this feature, the installation process is particularly easy - achievable even for a novice! The specified price is for 1 meter of strip. You can trust our products because we sell hundreds of meters of LED strips every day! Send us an inquiry, and we will make you an offer!

Waterproof silicone-coated [LED strip](#) suitable for damp environments. This product is sold in 5-meter rolls. The strip can be cut every 3 LEDs at intervals of 3 cm. It can be extended by soldering. A maximum of 7-8 meters of the strip can be connected to one power supply unit. Installation is made easy with 3M double-sided tape on the back of the LED strip. For best durability and heat dissipation, we recommend installing it with an aluminum profile. A power supply unit is required for operation, which can also be found in the LED House product range.

The LEDs are indistinguishable, the light is a continuous line - No direct need for a profile cover! This IP20 rated [LED strip](#) is perfect for creating a cozy atmosphere in dry indoor spaces. The LED strip has a very high color rendering quality (CRI90), ensuring the light beam does not distort the true colors in the room. Easy to install even for first-time users! The specified price is per meter of the strip. The total roll is 5 meters, which we can cut according to the customer's needs. Feel confident in our products as we sell hundreds of meters of LED strips every day! Send us an inquiry, and we'll make you an offer!

High-quality UVC [LED strip](#) for medical facilities, laboratories, water purification systems, and the food industry. UVC LED strips are used for disinfection and sterilization, and their radiation is effective in destroying microorganisms, bacteria, and viruses. The UVC radiation of the LED strip is potentially hazardous to humans and animals, and its use requires careful adherence to safety measures, including eye and skin protection. Do not look directly at the LED strip with the naked eye, and remove pets and houseplants from the room while the UV light is destroying bacteria! The specified price is per meter of the strip.
